## DETAILED ACTION

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-14 and 18-19, drawn to a method for treatment of a disease comprising topically administering a composition comprising a vasodilator and a lymphatic stimulator, classified in class 424, subclass 756 for example.
- II. Claims 15-17, drawn to a method for treating a disease in a patient comprising topically administering a composition comprising *A.Montana*, *E.Augustofolia*, and another plant such as *C.horridus*, classified in class 424, subclass 725 for example.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the different inventions . The methods of Groups I and II are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone because each method employs different constituents.

Thus, the search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the others, restriction for examination purposes as indicated is proper.

Claims 1, 2, 4, 7, 15 and 18 are generic to a plurality of disclosed patentably distinct species comprising a) a vasodialator, b) a stimulator of lymphatic activity (i.e., A. Montana, primorose oil...), d) a mobilizer of white blood cell activity such as L.ninta or C. Horridus, e) a plant extract such as primrose oil extract or flaxseed oil extract (Claim 7) , f) a plant extract such as Naja extract (Claim 15) and g) a composition such as r.

Art Unit: 1654

toxicodendron or R. graveoleus for example. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to John Lezdey on 9/10/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Patricia Patten, whose telephone number is (703)308-1189. The examiner can normally be reached on M-F from 9am to 5pm.
